

Skill Tracker

Welcome to Skill Tracker! Your ultimate learning command center designed to help you plan, practice, and prove mastery across any topic. This guide will walk you through from the absolute basics to utilizing advanced interactive AI.

1. Getting Started

To start tracking your progress, you'll need an account.

- Navigate to the landing page.
- Click the 'Launch Skill Tracker' button (highlighted in Green).
- Sign up using your email and a secure password. Your session securely tracks your daily Check-ins and Streaks!

2. Building Your Learning Track

Skill Tracker isn't just a list - it's a structured path.

- Once inside the app dashboard, locate the input bar.
- Type in whatever you want to learn (e.g., 'Machine Learning Basics').
- Click Generate Path.

The system will automatically organize your topic into structured milestones and break those down into manageable subtopics. Each subtopic contains curated online resources, such as videos and articles.

3. Interactive Document Learning (Pro)

Rather than just reading passive text, you can upload your own study materials and talk to them!

Skill Tracker: Official User Guide

- Navigate to your selected Topic workspace.
- Click '+ Upload PDF' and select your standard PDF.
- Interactive Studio: The Left Side shows a clean PDF viewer, while the Right Side acts as your AI Tutor Chat.
- Generate Practice Quizzes directly from your uploaded documents to test your mastery!
